

Manufacturers Represented

Arbor Technologies Manufacturer of industrial grade Single Board Computers for PCI, PC/104, Computer On Modules such as COM Express and ETX, Industrial Motherboards, Panel PC and Chassis, as well as Data Acquisition and Control boards and a variety of I/O Modules

CompuLab Is a leading manufacturer of computer-on-module boards and miniature PC systems. CompuLabs products excel with an advanced set of features, outstanding level of integration, high reliability and affordable prices

ComputerState Systems Manufacturer of rugged turn-key computer systems developed and qualified for extreme environments. Specializing in customized solutions for industrial applications.

Dolphin Interconnect Solutions Dolphin provides a variety of high performance products to solve the needs of financial, e-commerce, entertainment and embedded customers. These products enable customers to build and deploy faster more reliable systems.

Elcard A leader in the design and development of Industrial Wireless LAN products built for extreme environments and operate in wide temperature ranges; also offers an array of support products that include antennas, power amplifiers, cables and rugged displays.

EVOC Group Provides Embedded Products and System Integrated Solutions for various applications such as traffic systems, transportation, electric power, industrial automation, gaming, aerospace and medical. EVOC - Never-Ending Innovation

ICOP Technology Manufacturer of embedded SBC, processor module, and embedded systems. Products offerings comprise Half-size ISA SBC, PC/104 Modules, 3.5"-sized Embedded boards, palm-size Tiny and Mity-Mite Modules, Embedded-ATX boards, etc.

IEI / ICP Electronics Manufacturer of Single Board Computers, Servers, Industrial PC Chassis, Workstations, Panel PCs, PC/104 products, I/O boards, Power Supplies and Backplanes. The broad product range supports ISA, PCI and PC/104 bus architectures.

Kontron Manufactures, and integrates a wide range of Industrial Computer Products and Systems including AdvancedTCA, Compact-PCI, PCI, ISA, PC/104, Computer On Modules such as ETX and COM Express as well as other embedded form factor Single Board Computers

MEN Micro, Inc. Manufacturer of failure safe VMEbus and CompactPCI Single Board Computers as well as Computer On Modules, ESMexpress. Discrete, bus independent I/O Mezzanine Modules, including the M-Module, developed and qualified for extreme environments.

Nexcom Provider of applied computing platforms for embedded industrial and communications applications requiring Industrial PCs and CompactPCI Single Board Computers, embedded platforms, fault tolerant platforms, chassis and enclosures.

Noax Technologies Manufacturer of rugged and reliable Industrial Panel PCs intended for long-term operation in extreme environments.

OCTAGON SYSTEMS®

Octagon Systems Specializing in embedded industrial grade ruggedized Single Board Computers, I/O and network controllers for applications requiring extended temperature ranges, shock and vibration immunity, low power consumption, and small form factor.

Pro-Dex Inc, Oregon Micro Systems Specializes in bringing speed to market in the development and manufacturer of technology-based solutions that incorporate embedded motion control, miniature rotary drive systems and fractional horsepower DC motors, serving a variety of embedded markets.

Sealevel Systems Specializing in Serial and Digital I/O Products -- synchronous, asynchronous, analog or digital, Ethernet or USB devices, servers, rackmount chassis, and adaptors -- in a variety of form factors including PCI, PC/104, PCMCIA and CompactFlash.

Silicon Control Inc Manufacture of Bus Analyzers for PCI, VME, PMC and CPCI.

Specialty Wire & Cable Manufacturers high quality interconnect solutions. Products range from standard to custom and highly specialized, and are used in a wide range of applications and industries such as oil and gas, mining, and communications.

TRACAN
ELECTRONICS

6695 Millcreek Drive, Unit 8
Mississauga, Ontario
